DETAILED ACTION

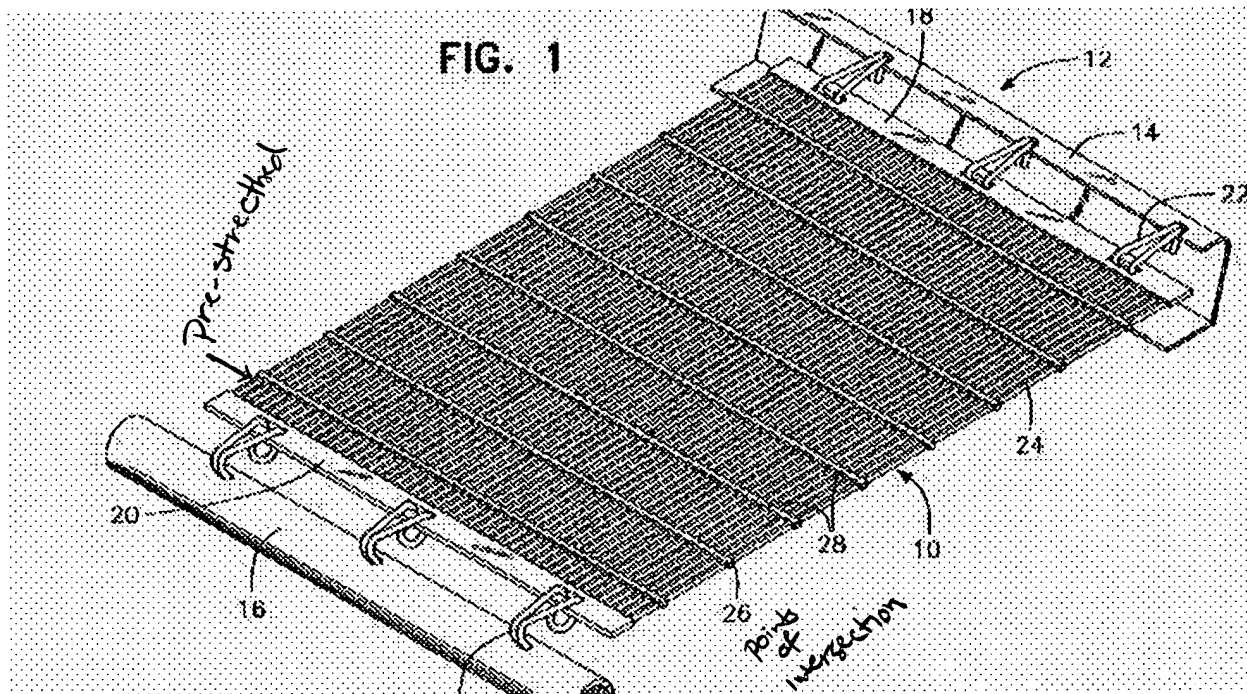

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 10,12-17,25-26 and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Skochdopole (6,060,407) in view of Witzke (4,603,907).

Skochdopole discloses the use of a frame (12) a substantially uniplaner, non-woven grid integrally formed with a pair of fasteners, the grid having a pre-stretched configuration and a second stretched configuration, wherein the grid further comprise a closely-spaced primary members and points of intersection. Skochdopole shows the use of all the claimed invention but fails to show the use of j-strip fasteners integrally with the grid to attach to the frame (see insert, fig.1). Witzke teaches the use of j-strip fasteners attached to the frame. It would have been obvious to one of ordinary skill in the art at the time of invention to modify the fasteners with j-strip fasteners as taught by Witzke, in order to maintain the grid in the stretched condition.

Allowable Subject Matter

Claims 1-9 and 21-24 are allowed.

Claims 11, 18-20 and 27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to claims 10-20 and 25-28 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion
